DETAILED ACTION

1. Claim 21 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected class 700/100, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 7.

Claim Rejections - 35 USC § 112

2. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Because it is confusing that the claim is dependent or independent.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2838

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takehara (U.S. Patent # 6,101,073).

Takehara's figure 2 discloses claimed subject matters.(Abstract line 1-12).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-16 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Madenokouji et al. (U.S. Patent # 6,046,919) in combination with Wagner et al. (U.S. Patent # 5,523,938) and further in combination with Innes et al. (U.S. Patent # 5,706,153).

Madenokouji et al. discloses claimed invention (figure 1), including power converter and power inverter. However Madenokouji et al. does not disclose the utilization of the technique for a ground fault detector and a controller records information related to the ground fault in a memory. Wagner et al. teaches the utilization of similar technique for ground fault detection(column 2, line 1-35) and Innes et al. teaches the utilization of technique for a controller records information related to the ground fault in a memory. It would have been obvious to one

having ordinary skill in the art at the time the invention was made to modify Madenokouji et al.'s power generating device by utilizing a technique taught by Wagner et al. and Innes et al. for the purpose of protecting the circuit components of the power converter.
